EXPERIENCE

Data Processing Analyst II

2022 – Present

SupportNinja

Remote

- Manage backend operations, data handling, and file conversion workflows supporting international clients.
- Provide analytics support by organizing and processing large volumes of data to inform business decisions.
- Coordinate across teams to maintain data accuracy and streamline day-to-day operational processes.

Frontend Developer

March 2022 - June 2022

GridTek

Remote

- Designed and built responsive, user-friendly web pages using **HTML**, **CSS**, and **JavaScript**.
- Improved site layouts and page structure to ensure clean, consistent, cross-device design.

Data Processing Analyst

2021 - 2022

Bolton International Inc

Remote

- Validated and maintained data accuracy across multiple systems, identifying and resolving discrepancies.
- Coordinated with cross-functional teams to resolve data issues and improve reporting reliability.

Data Processing Specialist

2019 - 2021

Bolton International Inc

Remote

- Entered, verified, and organized records across multiple databases to ensure accuracy and integrity.
- Maintained efficient data retrieval processes to support day-to-day business operations.

PROJECTS

Self-directed projects built over 3 months of focused Python study

AI Chatbot | *Python, Flask, Google Gemini API, HTML, CSS, JavaScript*

- Built a simple chatbot website using **Flask** and **Google's Gemini AI**, styled to look like ChatGPT

Music Player | *Python, Tkinter, Pygame, Mutagen*

- Built a desktop music player with playback controls and a playlist.

Weather App | *Python, Requests, REST API*

- Created an app that shows live weather info using a public API.

Expense Tracker | *Python, Flask, SQLAlchemy, SQLite, Tailwind CSS, Chart.js, Jinja2, JavaScript*

- Built a web app to track expenses, with filters and charts.

Calculator | *Python, PySide6 (Qt)*

- Made a working calculator with a clickable button interface.

QR Code Generator | *Python, qrcode, Pillow*

- Made a script that turns text or links into downloadable QR codes.
